DETAILED ACTION

Priority

This application filed under former 37 CFR 1.60 lacks the necessary reference to the prior application. A statement reading "This is a continuation of Application No. 09/482936, filed January, 14, 2000." should be entered following the title of the invention or as the first sentence of the specification. Also, the current status of all nonprovisional parent applications referenced should be included.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 1, 4-7 and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Nakashiba et al. Nakashiba et al disclose a wafer polishing head for planarizing a wafer comprising a carrier 1 for loading a wafer 4, a wafer adhering layer 2 disposed beneath the carrier 1, a retaining ring 3 surround the carrier 1 and the wafer adhering layer 2, a first pressure chamber 22 having a first inner pressure disposed above the retaining ring 3, a second pressure chamber 10 having a second inner pressure disposed on the carrier 1, a relative height between the retaining ring and the carrier can be adjusted by changing the first and the second inner pressure, an automatic control system coupled

Art Unit: 3723

to the first pressure chamber and second pressure chamber (note Fig. 1, 5, 6, col. 3, line 65 to col. 4, line 12, col. 8, line 41 to col. 9, line 57, col. 11, lines 1-25).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kobayashi et al, Guthrie et al, Volodarsky et al and Numoto et al are cited to show wafer polishing head.

This is a continuation of applicant's earlier Application No. 09/482936. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dung V Nguyen whose telephone number is 703-305-0036. The examiner can normally be reached on M-F, 6:30-3:00.
